FACT

The **speed of change** has **accelerated**

Digitalization, new technologies (with recent AI revolution), hybrid work & younger generations **have transformed the way we work forever.**

- ✓ Work has become less delimited
- ✓ Requests come from many more channels
- ✓ Boundaries between work & life have faded
- ✓ Change has become the new norm with a boost in opportunities & threats
- ✓ Our jobs became more complex.

OUR SOLUTION

is to changing the culture

Culture is the **sum of the habits** within an organization. That's why **leaders need to adopt the habits of fast times** to transform themselves and their teams.

Those **regenerative habits** are the building blocks of this program and lead to an increase in impact, meaning and balance. It's a **win-win-win for people, the organization and the planet.**

PROBLEM

Most **leadership habits** that we use today were invented in **slow times.**

And they used to worked well! But in our fast times, they create **chaos**, an **explosion of workload, communication issues, silo thinking**, and **slow and inefficient decision processes.** They might even lead to **degenerative results.**

CONSEQUENCES

- ✓ Leaders find themselves **working too hard for too little impact**
- ✓ **Engagement decreases** in their teams
- ✓ **Stress & burnouts** increase
- ✓ They are **not agile** or creative enough.

Jump in if...

You are a **leader, manager, entrepreneur,** or **director** who is operating in a fast-changing environment

You realize that **what used to work does not work anymore.**

You want to **have more impact**, bring your team/organization to the next level while **maintaining healthy work-life balance** for yourself and your team

Regenerative Leadership

HAVE YOU EVER HEARD OF REGENERATIVE LEADERSHIP ?

Regenerative leadership is a leadership approach that seeks to **create sustainable and thriving systems by focusing on the well-being** of individuals, organizations, and the environment.

Regenerative leaders have shown amazing results*

* Based on a study conducted by QiLeader & Solvay Brussels School with over 750 participants in the research

THE REASON WHY REGENERATIVE LEADERS ACHIEVE GREATER RESULTS

They understood that the world has changed and have abandoned the habits of slow times to adopt those of fast times

The world has changed a lot in recent years. We've moved from dial-up internet to 5G, from Blockbuster to Netflix, and from fax machines to... well, do fax machines even exist anymore? Not to mention AI! We face new challenges like **climate change** and a **pandemic** that has reshaped the way we work, live, and interact with each other.

Things are moving at lightning speed.

As leaders and managers, **we can't just sit back** and watch as the world changes around us. **We need to embrace these changes**, harness the power of technology, and find new and innovative ways to lead our teams and organizations forward. This can be overwhelming at times, as we deal with huge **workloads, stress, burnout, and high employee turnover**.

FEAR NOT, WE'VE GOT THIS

With the **right mindset, regenerative leadership habits, and support**, we can conquer any challenge that comes our way.

Whether you have years of leadership experience or are just starting out, we invite you to join us on this exciting journey.

Together, we can navigate the twists and turns of the modern world and emerge stronger, wiser, and more inspired than ever before.

THE PROGRAM AT A GLANCE

For **leaders, managers, CEO's entrepreneurs** looking to **increase their impact & balance** in a fast, digital & overloaded world

3 live workshops at Solvay, **4 self-paced online modules**, **3 group coaching moments**

30h in 3 months or 2h per week

Designed to **transform** busy leaders, not simply give knowledge

"Almost everything in this program was new for me. And I've followed a lot of leadership trainings already". **Gretel - CEO Mensura Group**

SLOW TIMES VS. FAST TIMES

THESE "GOOD SLOW TIMES"...

Do you remember a few decades ago? Things were so much easier

- The speed of change was low
- Tasks were more delimited
- There were fewer requests to deals with
- Work was simpler

...VS. NOWADAYS FAST TIMES

What has changed?

- Technologies create an abundance of opportunities and threats
- 24/7 hybrid work has eliminated many boundaries between work and life
- Demands flood in from more and more channels
- Jobs have become more complex and interconnected, demanding constant attention

THIS RESULTS IN...

An explosion of workload !

While being constantly connected has its perks, it has become more and more challenging for your people to maintain a decent work-life balance.

It's like a never-ending game of staying ahead, tackling issues as they arise, and keeping up with the latest trends and technologies.

44%

of workers feel stressed because of their workload

WHAT ABOUT YOU ?

SLOW TIMES

Fewer opportunities & threats

More delimited tasks

Less requests from less channels

Limited work time

Most job are simple

FAST TIMES

Many opportunities and threats

Less delimited tasks

Many requests from more channels

24/7 connection, hybrid work & lot of screen time

Interconnected complex jobs

It has become impossible to deliver everything that comes on your plate. Are you still trying ?

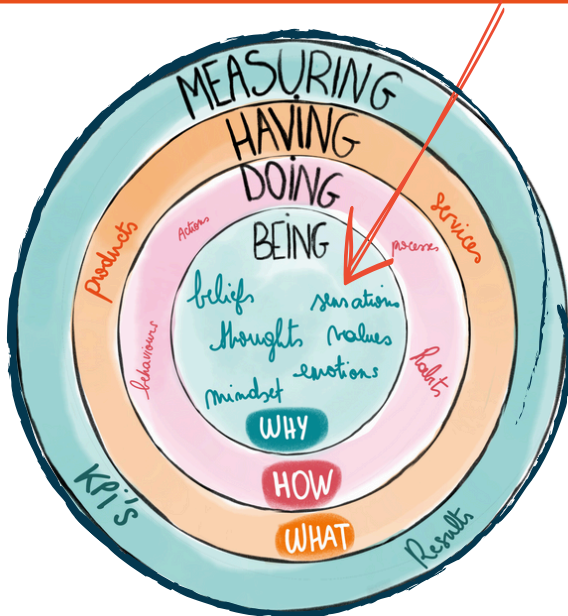

THE QUESTION NOW IS “HOW TO HANDLE CHANGE?”

It would be tempting to think that in order to have more impact and get great results as a leader, one must implement more Key Performance Indicators (KPIs), change the strategy, make news plans and improve processes.

But that’s nearly not enough, most companies forget the most important aspect:

Changing the Culture

USUAL WAY OF HANDLING CHANGE

A MORE IMPACTFUL WAY

Organizations tend to **initiate change from outside to inside**, creating resistance and **stress** at the level of their people

A better approach would be to **change leaders at the core of their being**, by shifting their values, thoughts, and beliefs before their actions

Interesting...
But how will transforming leaders at a personal level impact and change the overall culture?

“Regenerative Leadership - Foundations” transforms leaders at a profound level, positively impacting their team and organization.

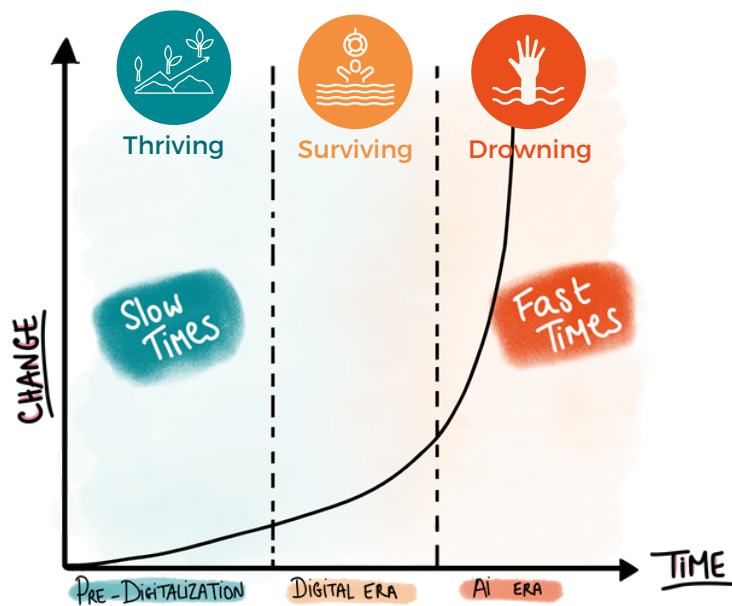

- You only need one person and a follower to change the system
- Culture is the sum of habits: To successfully apply collective shift strategies, it's essential first to embrace and understand the individual regenerative transformations required both for yourself and your team members. Our program ensures you grasp these key concepts, paving the way for impactful collective change. You cannot build a building without strong foundations.

ARE YOU READY TO MAKE THE DIFFERENCE ?

THE DRAMATIC CONSEQUENCES OF OUTDATED LEADERSHIP HABITS

Continuing with outdated leadership habits from slower, more predictable times can lead to **degenerative results**, such as decreased team engagement, lower productivity, stagnant innovation, burnout, and toxic environments. As change accelerates in the AI era, many leaders already in survival mode risk drowning, unable to keep up.

OUR PLANET

When leaders start to act more in line with their values instead of their ego or (unconscious) fears, **their actions become more sustainable & ethical**. Diversity & inclusion improve also when people connect with each other in more authentic ways. This has a **positive ripple effect on our planet** in the long term.

Together Is Better

“You only need one person and a follower to initiate a transformation”. True, but...There is nothing but a **collective change** for a **greater impact**.
